

Requirement Checklist — Improved

Assignment Requirement	Status	Evidence	Action
Complete Python notebook (.ipynb only)	✔ Done	Notebook available and executable	—
PDF of notebook with results	✔ Done	PDF contains code, outputs and graphs	—
Custom dataset files + schema documentation	⚠ Partial	Dataset generated inside notebook; separate dataset file missing	Export dataset files (JSON/CSV); add schema.json; add README describing
Decoder model implementation from scratch	✔ Done	Custom Transformer decoder with positional encoding + causal mask	—
LLM prompting pipeline + prompt templates	⚠ Acceptable but im	Pipeline exists but templates can be clearer	Add prompt templates file, examples variable descriptions
Training loop with loss calculation	✔ Done	15 epochs with CrossEntropyLoss shown	—
Comparative evaluation + visualization	✔ Done	Metrics table and graphs available	—
Output examples with analysis	⚠ Partial	Some examples exist; assignment asks for ≥10 outputs	Generate at least 10 outputs and add analysis
Technical report	✔ Done	Design decisions, challenges and limitations included	—

Summary: ✔ Done: 6 ⚠ Partial: 2 ⚠ Needs improvement: 1 | Actions: items marked Partial/Acceptable include recommended next steps.
